

# Aircraft Breakdown Assistance

Fueled by  **Savvy Aviation**

A mechanical problem with your aircraft while away from home can be an owner's worst nightmare. It's a helpless feeling to be stranded in an unfamiliar place and forced to depend on mechanics and advisers you don't know or trust. Global Aerospace has developed a solution to provide you with peace of mind while away from home – **the new Aircraft Breakdown Assistance program fueled by Savvy Aviation is now available to US Global Aerospace policyholders at no additional cost!**

## 24/7 Access

24/7 access to a dedicated toll-free Aircraft Breakdown Assistance hotline for Global policyholders

Think of it as AAA<sup>®</sup> for GA. A Savvy experienced maintenance expert will respond anytime, usually within 15 minutes.

## Experienced Mechanics

Savvy's extraordinary team of veteran A&P/IAs are specialists in rescuing aircraft owners in distress.

A seasoned A&P/IA will help you determine whether your aircraft is safe to fly. If it isn't, they will help you find a trustworthy mechanic nearby and work with them to get you safely back in the air.

## Value

Aircraft owners pay \$150/year for this program, as a Global policyholder it's included!

Global Aerospace has made a special arrangement with Savvy to make this program available to its policyholders\* at no additional cost.

**Activate your membership at [savvyaviation.com/global](http://savvyaviation.com/global).**

### Your Savvy technician will:

- Troubleshoot the problem with your aircraft and arrive at diagnosis
- Help you determine whether your aircraft is safe to fly home

### If repairs are needed, your technician will:

- Identify a nearby qualified maintenance provider
- Contact mechanic and describe recommended repairs
- Obtain cost estimates
- With approval, direct mechanic to perform work and provide oversight
- Review final invoice and maintenance record to approve for payment

The Aircraft Breakdown Assistance Program is available at no additional cost to you if your policy through Global Aerospace, Inc. has an inception date on or after January 1, 2018 and has a US address.\* **Activate your membership TODAY at [savvyaviation.com/global](http://savvyaviation.com/global) to ensure you are covered when you need it!**

\*Applies to most piston-powered single-engine airplanes weighing less than 12,500 pounds maximum gross takeoff weight that have a standard United States airworthiness certificate and experimental amateur-built RV-series airplanes built from kits manufactured by Van's Aircraft. Some aircraft are simply impossible for Savvy to provide expert recommendations and assistance. These include rare and vintage aircraft that are not adequately supported by the manufacturer with respect to things like service manuals, parts manuals, and replacement parts. Limited time offer.
