

European General Aviation Airfields Insurance

What is Airfields Insurance?

Airfield owners and operators face exposure to claims for bodily injury and property damage from third parties including aircraft operators, members of the public, tenants and service providers.

Global Aerospace's comprehensive insurance policy for airfield owners and operators provides legal liability coverage arising at the insured airfield and any premises used by the insured in connection with their aviation business (Premises Liability).

General Aviation Airfields Insurance policyholders can expect:

- Affordable, comprehensive coverage
- Electronically issued policies through your broker
- 24 hour underwriting and claims service

The benefits of Global Aerospace's policy wording*:

- **Motor legal liability coverage.** Provides coverage for the use of vehicles within the confines of an airport/airfield (excluding road traffic act or equivalent) which would ordinarily be excluded from motor policies.
- **Property damage to vehicle** not owned, rented or leased by the insured, but in their care, custody, or control.
- **Legal protection.** Insurers will defend the Insured when a suit is brought against them and reimburse legal costs and expenses in addition to the limit of liability.
- **Liability arising out of the supply of food and drink by the Insured** at their covered premises.
- **Coverage at any premises** used by the Insured in connection with their business as airfield operator/owner.
- **The option to include liability arising from directors, officers and employees** of the Insured using their own vehicles within the confines of the airfield at which the Insured operates for the purposes of travelling to and from their place of work.
- **Drafted by in-house** policy wording specialists and regularly reviewed to maintain relevancy.

**Subject to all terms, conditions and exclusions of Global GTP 100B wording.*

Global Aerospace Underwriting Managers Limited

Fitzwilliam House, 10, St Mary Axe
London EC3A 8EQ
United Kingdom
