

2022 Global Aerospace Carbonfree[®] Program

Panama Reforestation Project: Reforesting a Lost Tropical Rainforest

Location

Chiriquí, Veraguas, and Darien Provinces, Panama

Project Type

Reforestation and Forest Conservation

Total Size

7,000 acres

Standard

Climate, Community and Biodiversity Standard (CCBS) and CarbonFix Standard (CarbonFix has since been acquired by the Gold Standard)

Verification/Validation

SCS Global Services and Rainforest Alliance

Environmental Benefits

- Mitigate impacts of climate change
- Restore rainforest and critical habitat
- Enrich local biodiversity
- Reduce erosion and improve soil quality
- Protect downstream watersheds

Community Benefits

- Reverse trend of rural-to-urban migration
- Local full-time job creation
- Training opportunities for project management and fire prevention
- Access to health and literacy programs

2022 Global Aerospace Carbonfree[®] Program

Dubuque Landfill Gas Methane Capture Project

Location

Dubuque, Iowa

Standard

Climate Action Reserve (CAR)

Project Description:

The Dubque Landfill Methane Project is a landfill gas plant that captures potent methane. The landfill gas, which includes methane and carbon dioxide, is collected from the landfill.

The project reduces the amount of methane released into our atmosphere. Methane gas is significantly more potent than carbon dioxide and its capture is important for emissions reductions allowing the project to have major benefits for climate change mitigation.

Carbonfund.org
REDUCE WHAT YOU CAN OFFSET WHAT YOU CAN'T™

A donation to Carbonfund.org has been made in 2022 in the name of:

Global Aerospace

For offsetting 667 carbon credits via the Panama Reforestation Project and 664 carbon credits via the Dubuque Landfill Gas to Energy Project in Iowa, USA.

This donation to Carbonfund.org is helping fight global warming today by supporting forest conservation and clean energy projects that help to create a more sustainable future.
